

Branding Options

The program of the website accidentsketch.com is available as customer application and can be attached with a Custom-Branding. The light grey areas in the following graphic will be individualized. The buttons in the corner down to the right can be labeled with text of your choice and linked to user-defined popups.

The Pdfs generated by the system including the sketch of the accident can be customized matching the client's CD.

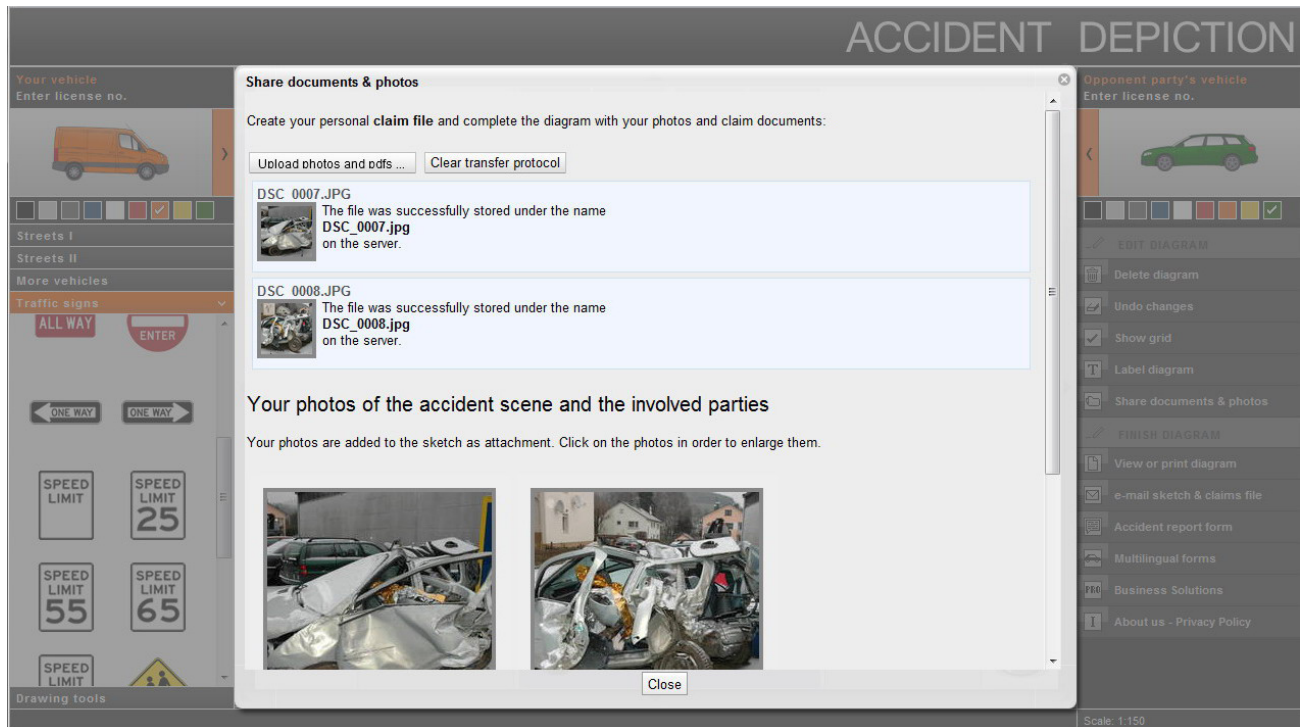

Besides this Custom-Branding we offer a Full-Service-Providing. With this option the website of accidentsketch.com is adapted in its function and design to the current customer's website appearance.

Technics and Conditions:

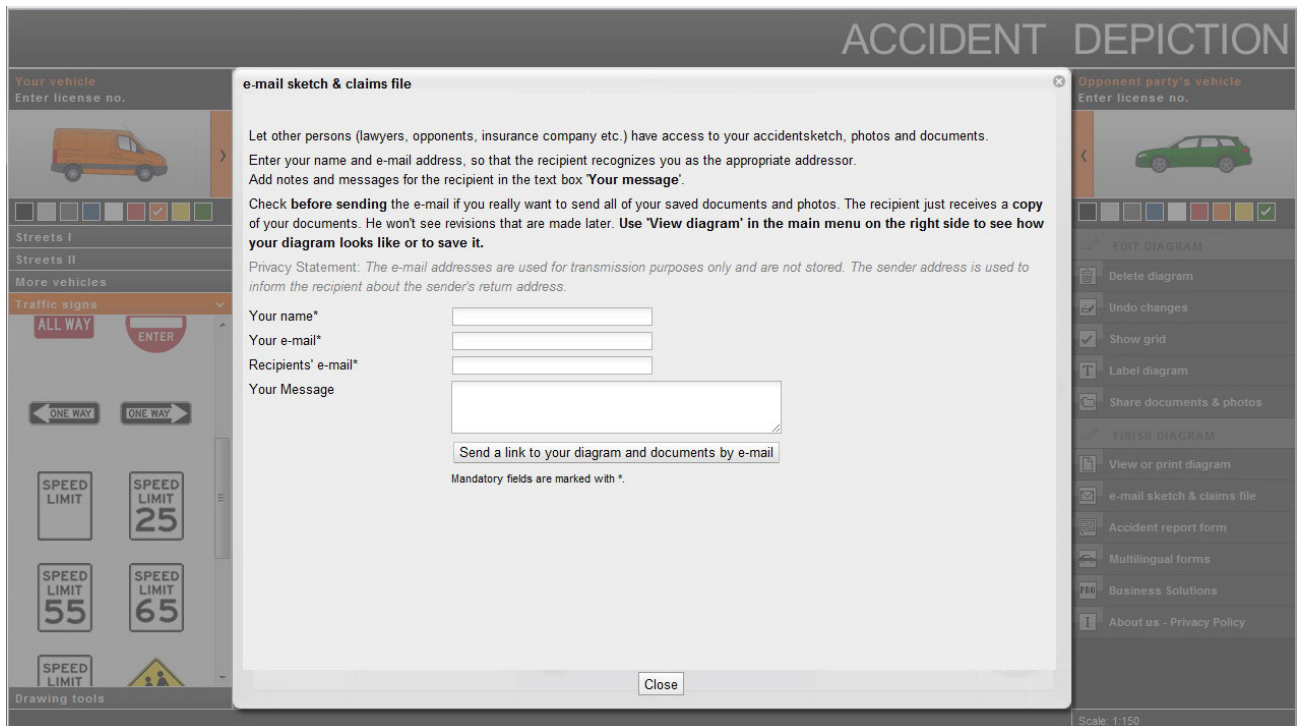

The program of the website accidentsketch.com in form of customer application is hosted on our servers, in which an individual URL (domain or link from client portal) can be used.

The all-inclusive price for the monthly using and hosting as Custom-Branding is available on request with a duration of 12 months and a special advantage during the introduction stage. Different periods are possible but charged with individual conditions. Within the Custom-Branding the data content as HTML or PHP-files is provided by the customer or as the case may be by the ClaimMS GmbH and is charged individually depending on the complexity.
